Unraveling the Foundations of Knowledge

The book begins by delving into the fundamental questions that define epistemology. What is knowledge? How do we acquire it? What makes one belief justified while another remains unfounded? Blackburn guides readers through the intricate web of theories that have sought to answer these questions, exploring the ideas of Plato, Aristotle, Descartes, Locke, Hume, and other philosophical luminaries.

Through clear and engaging prose, Blackburn unpacks complex epistemological concepts, such as skepticism, empiricism, and rationalism. He examines the nature of truth and justification, exploring the different criteria that philosophers have proposed for determining whether a belief is true or well-grounded.
