

# Class Transferases III EC 6.0. Enzyme Handbook Vol 30

This volume of the Handbook of Springer Enzymes provides a comprehensive and informative overview of the various types of transferases, including EC 6.0, which catalyze the transfer of functional

groups from one molecule to another. This volume presents detailed descriptions of the substrate specificities, reaction mechanisms, and kinetic properties of these enzymes. In addition, it provides a wealth of information on the physiological roles of these enzymes and their applications in biotechnology and medicine.

## Class 2 Transferases III: EC 2.3.1.60 - 2.3.3.15 (Springer Handbook of Enzymes, 30)

 5 out of 5

## Table of Contents

- Transferases of Amino Acids and Peptides
- Transferases of Nucleotides and Nucleosides
- Transferases of Other Nitrogenous Compounds
- Transferases of Phosphorus-Containing Compounds
- Transferases of Sulfur-Containing Compounds
- Transferases of Halogens
- Transferases of C-C and C-X Bonds

- Transferases of Other Groups
- Index

## Audience

This volume of the Handbook of Springer Enzymes is an essential reference for researchers and students in the fields of biochemistry, molecular biology, and biotechnology. It is also a valuable resource for professionals in the pharmaceutical and biotechnology industries.

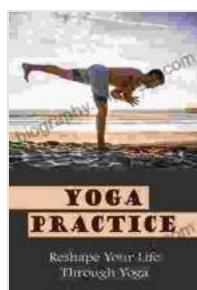

## Reviews

"This volume of the Handbook of Springer Enzymes is a comprehensive and informative overview of the various types of transferases, including EC 6.0, which catalyze the transfer of functional groups from one molecule to another. This volume presents detailed descriptions of the substrate specificities, reaction mechanisms, and kinetic properties of these enzymes. In addition, it provides a wealth of information on the physiological roles of these enzymes and their applications in biotechnology and medicine." - **Journal of the American Chemical Society**

"This volume of the Handbook of Springer Enzymes is an essential reference for researchers and students in the fields of biochemistry, molecular biology, and biotechnology. It is also a valuable resource for professionals in the pharmaceutical and biotechnology industries." - **Nature Biotechnology**
