Product Description

Lung cancer is the leading cause of cancer death in the United States, and its incidence is increasing worldwide. This book provides a comprehensive overview of the latest advances in the diagnosis and management of lung cancer, with a focus on the multidisciplinary approach to care.

The book is divided into four sections:

- **Section 1: Epidemiology and Risk Factors**
- **Section 2: Diagnosis and Staging**
- **Section 3: Treatment**
- **Section 4: Survivorship**

Each section is written by experts in the field, and provides a comprehensive overview of the latest research and clinical practice. The book is also riccamente illustrato con immagini e tabelle, che rendono i concetti chiave facili da comprendere.

Target Audience

This book is intended for pulmonologists, oncologists, and other clinicians who care for patients with lung cancer. It is also a valuable resource for researchers and students in the field of lung cancer.

Table of Contents

1. **Section 1: Epidemiology and Risk Factors**
