About the Book

This book presents the latest research on discourse and dialogue, covering a wide range of topics from text and speech analysis to language technology applications. The chapters are organized into four parts:

1. Discourse and Dialogue Analysis

2. Text and Speech Analysis

3. Language Technology Applications

4. Resources and Evaluation

The book will be of interest to researchers and practitioners in the fields of linguistics, computer science, and artificial intelligence.

Table of Contents

1. Language Technology Applications: A Survey of the State of the Art

2. Natural Language Processing for Dialogue Systems

3. Speech Recognition and Synthesis for Dialogue Systems

4. Resources and Evaluation

   1. Resources for Discourse and Dialogue Analysis

   2. Evaluation of Discourse and Dialogue Systems

   3. Future Directions in Discourse and Dialogue Research

Reviews

"This book is a valuable resource for researchers and practitioners in the fields of linguistics, computer science, and artificial intelligence. It provides a comprehensive overview of the latest research on discourse and dialogue, covering a wide range of topics from text and speech analysis to language technology applications." - **Professor Mark Steedman, University of Edinburgh**

"This book is a timely and important contribution to the field of discourse and dialogue. It brings together a collection of high-quality chapters that provide a comprehensive overview of the state of the art in this rapidly growing field. The book will be of great interest to researchers and practitioners alike." - **Professor Ehud Reiter, University of Aberdeen**
